Welcome to Curative

Our Network of Physicians and Hospitals

Curative offers PPO benefits – but physicians and other medical providers listed in this directory actually provide the medical care.

We've taken care to ensure that no matter where you live or work in the Austin area (including Travis and Williamson Counties), you'll find a doctor's office location convenient for you. Your current physician may even be a part of our network, so be sure to look for his or her name inside. Physicians are listed alphabetically by last name for each provider type and location. If you have any questions about the information in this directory, please give us a call. Our representatives can guide you through the physician selection process.

Choosing Your Personal Physician

This directory lists the physicians affiliated with Curative. They are not employed by Curative – they are physicians in private practice who have joined our network of care. Before they join, they go through our thorough credentialing process, in which we review their education, background and practice history.

Now, the doctor-patient relationship is a personal one, therefore it is important that you are pleased with your selection. So if you decide you need to change doctors for whatever reason, you have freedom of choice. We encourage you to develop a real partnership with your physician and his or her staff because these are the people you will call when you need medical care or have questions about your treatment.

If there is a particular specialist or hospital that you want to use, this directory lists all our affiliated primary care physicians, specialists, hospitals and other health providers.

How to Get the Care You Need

Curative provides PPO coverage, so please take advantage of your benefits and get the health care and services you need when you need them.

To do so, call your provider's office to schedule your appointments whether you're scheduling an annual physical, for a routine visit or to have a condition you think may warrant specialty care.

When You Have an Emergency

A medical emergency is when you reasonably believe that your health is in serious danger – when every second counts. You may be experiencing serious pain, a bad injury, a serious illness, or a medical condition that is quickly getting much worse.

If you have a medical emergency:

• Get medical help as quickly as possible. Call 911 for help or go to the nearest emergency room. You do not need to get permission first.

• Make sure that your primary health care provider knows about your emergency because he or she will need to be involved in your follow-up care. You or someone else should call to tell your primary health care provider about your emergency care as soon as possible, preferably within 48 hours.

When You Urgently Need Care

Urgently needed care is when you need medical attention right away for an unforeseen illness or injury and it is not reasonable, given the situation, for you to schedule an appointment for medical care from your primary health care provider or other Curative-affiliated medical provider. Perhaps you're out of the area (See Service Area listing below) or it's after hours. The difference between urgently needed care and an emergency is that, in an urgent situation, your health is not in serious danger.

The Curative Service Area

If you live or work in one of the following counties in the Central Texas area, you are within the Curative service area. The service area is considered "in-area," and is where you need to receive your medical care (except in cases of an emergency, urgently needed care, or out-of-area renal dialysis).

- Travis County
- Williamson County

If you have any questions about this, please call Curative at
